NeoGen® Resorbable Collagen Wound Dressings are absorbent, porous, collagen matrices engineered from purified collagen derived from bovine dermis tissue.

Product features:
- Applied directly to the wound and protects the wound and delicate new tissue
- Aids in wound healing
- Available in tape, foam and plug form
- Essentially resorbs within 30 days of placement

They are indicated for the use of oral wounds and sores including denture sores. Oral ulcers (non-infected or viral), periodontal surgical wounds, suture sites, burns, extraction sites and traumatic wounds.
